

Large, Small or In-between: ERP is for Manufacturers of All Sizes

A cloud solution for business management can help you achieve success against larger competitors.

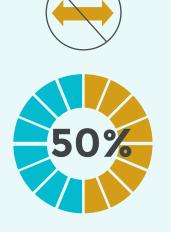

Is your business small to mid-sized?

Despite your size, are you still struggling to plan resources across your business?

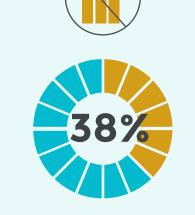

Good news – Enterprise Resource Planning (ERP) systems are a fit for everyone.

Life Without a Manufacturing ERP = Efficiency at a Premium

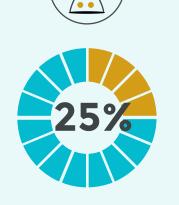

Manufacturers without ERP systems report the following challenges:

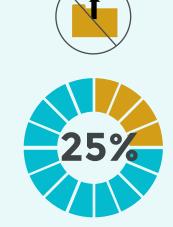

Lack collaboration capabilities

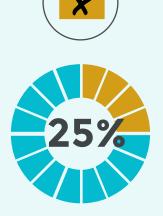

Cannot track business processes

Say it takes too long to **access data**

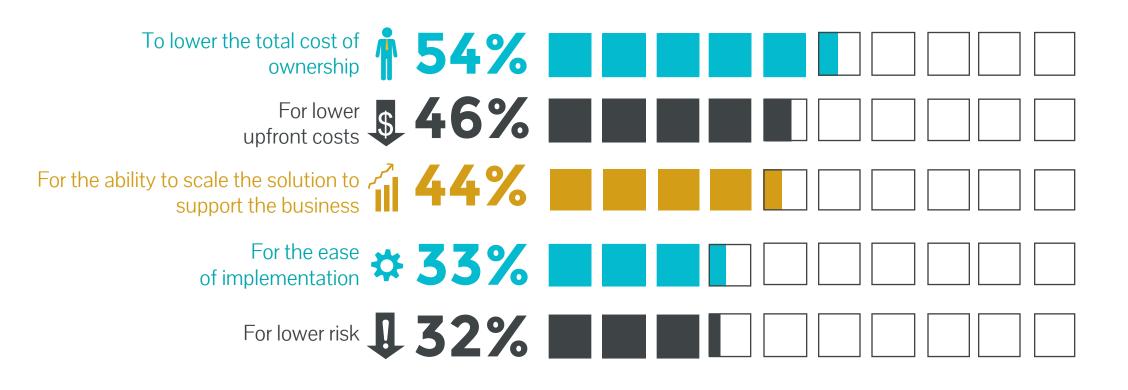

Cannot **share data** externally

Cite **inaccurate** data

Small Organizations, Enterprise-Sized Potential

These organizations consider cloud manufacturing ERP systems for the following reasons:

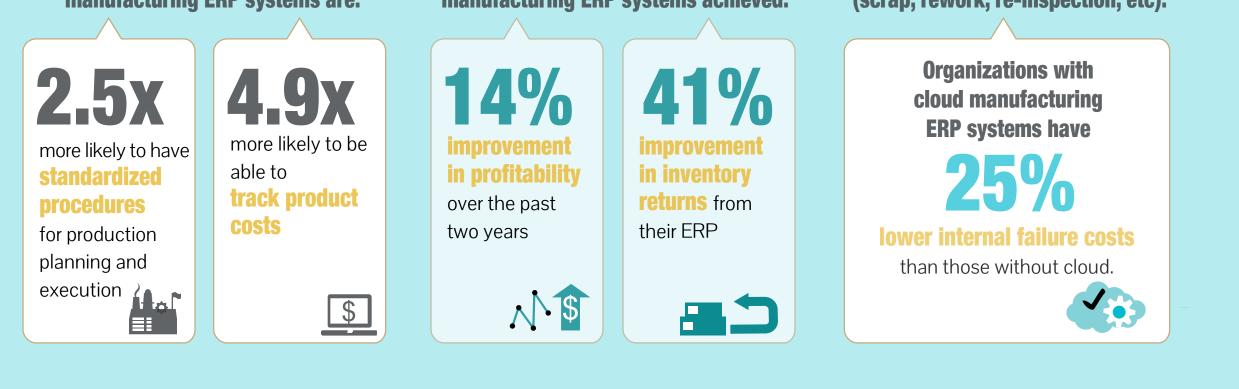

Size Doesn't Matter to Reap the Benefits

Small organizations with cloud manufacturing ERP systems are:

Small organizations with cloud manufacturing ERP systems achieved:

Internal Failure Costs (scrap, rework, re-inspection, etc):

Many small manufacturers consider much-needed manufacturing ERP systems to be out of reach. Research shows, however, that a well-managed cloud solution can be a continuing source of cost savings and operational improvements that helps businesses grow and thrive – regardless of their size.
